DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-16 are drawn to a door, classified in class 52, subclass 784.11.

II. Claims 17-30 are drawn to the process for manufacturing the door classified in class 29.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the door of group I is capable of being made by a materially different method, such as using another method for forming the grooves on the panels. For example, one may use a chisel to form the grooves.

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by

Art Unit: 3635

their different classification, restriction for examination purposes as indicated is proper.

3. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of MPEP § 821.04. **Process claims that depend from or otherwise include all the limitations of the patentable product** will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103, and 112. Until an elected product claim is found allowable, an otherwise proper restriction requirement

Art Unit: 3635

between product claims and process claims may be maintained.

Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See "Guidance on

Treatment of Product and Process Claims in light of In re

Ochiai, In re Brouwer and 35 U.S.C. § 103(b)," 1184 O.G. 86

(March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is

advised that the process claims should be amended during

prosecution either to maintain dependency on the product claims

or to otherwise include the limitations of the product claims.

Failure to do so may result in a loss of the right to rejoinder.

Further, note that the prohibition against double patenting

rejections of 35 U.S.C. 121 does not apply where the restriction

requirement is withdrawn by the examiner before the patent

issues. See MPEP § 804.01.
